Analyze images in Vision Studio

30 Minutes Remaining

[Instructions](#) [Resources](#) [Help](#)  100%

- ✓ 4. Upload the **store-camera-3.jpg** file.
- ✓ 5. In the **Detected attributes** box, observe the list of detected objects and their confidence scores.
- ✓ 6. Hover your mouse cursor over the objects in the **Detected attributes** list to highlight the object's bounding box in the image.
- ✓ 7. Move the **Threshold value** slider until a value of 70 is displayed to the right of the slider. Observe what happens to the objects in the list. The threshold slider specifies that only objects identified with a confidence score or probability greater than the threshold should be displayed.

Clean up

If you don't intend to do more exercises, delete any resources that you no longer need. This avoids accruing any unnecessary costs.

- ✓ 1. Open the **Azure portal** <https://portal.azure.com> and select the resource group that contains the resource you created.
- ✓ 2. Select the resource and select **Delete** and then **Yes** to confirm. The resource is then deleted.

Learn more
